## PADDING

Our padding systems are all multi-layered to create the perfect balance between comfort and longevity. High quality, high density 100% polyurethane foams ensure longevity. Salon tops feature super high density lower layers in the seating area for excellent longevity. We do not use memory foams because these can cause ergonomic problems for therapists and do not enhance the comfort in comparison to our designs.

**4" (10cm) Aero•Cel™**  
Oakworks® exclusive system features the best combination of softness, longevity and ergonomics for therapists.

**6" (15cm) Aero•Cel™**  
When the ultimate in comfort is required, this is it. The same high quality foams as in the 4" system, just softer. Note: does increase the height of the tables by 2".

**3" (8cm) Plush**  
This lower cost system creates a good balance between comfort and longevity.
