

Procedure Chairs

3000 | 3050 | 3100

Mobility System

Easily move your chair in the room
(not for patient transport)

« *The most cost-effective ADA compliant procedure chair in the market today* »

3050 Procedure Chair

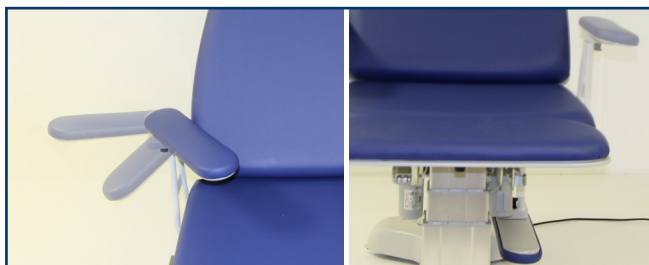

3050 Model
Arm Rest and Mobility
System standard
(not for patient transport)

- Powered: height, back rest
leg rest, trendelenburg
- ADA 19" low height
- 550 lb weight rating

3000 Model
(shown with optional
headrest)

Oakworks Procedure Chairs, with their 19" low height and fully powered functions are a cost effective ergonomic solution for many procedures and exams. Built in our Pennsylvania factory and backed by a 3 year parts, 2 years labor warranty.

Arm rests can be rotated horizontally and can be folded down, out of the way, providing excellent access

Our Mobility System at the push of a button allows you to move the chair and lock it in place.

see page 4 for specifications on each model

3100 Procedure Chair

- Powered: height, back rest, leg rest, trendelenburg
- ADA 19" low height
- 550 lb weight rating

Better Access, Better Ergonomics

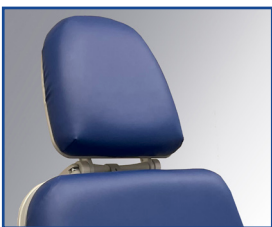

Eliminating the large central column many use, our twin lifting tower design supports access from all sides of the chair.

3100 Model

Mobility System standard
(not for patient transport)

The 3100 Procedure Chair comes standard with stirrups and a narrower leg section that permits the stirrups to be extended or retracted with the patients legs supported.

Flat Headrest Pad

Adjustable in height and angle, U-Shaped Pad for prone available

Hand Control

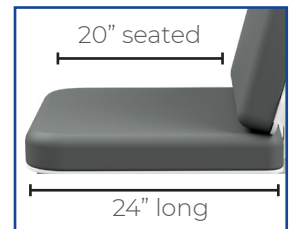

User programmable memory positions and presets

Removable Pads

Remove for cleaning or replacement

Seat Section

Our unique hinge design shortens the seat for more comfort.

Accessory T-Rail

Easily attached to multiple locations

Side Rails

Fold down completely out of the way

Stirrups

Retractable, adjustable in length and width

Procedure Tray

Retractable, Stainless steel

see page 4 for specifications on each model

Comparison Chart/ Specifications
